Kyiv, Ukraine

10+ years of experience building and scaling full-stack products.
Expertise in React, Next.js, TypeScript, PHP, Node.js, PostgreSQL, MySQL, GitLab
Familiar with Symfony, Redis, Laravel, CodeIgniter, Docker, SEO, Mixpanel, E2E testing, Unit Testing, WordPress, Azure AI Translation
English – Advanced; Portuguese - intermediate; Spanish - native.

Freelance: Oct 2025 – Present – **Senior Full Stack Engineer**

Project: Nerdy Panda — Facebook Marketplace Automation Platform

- Developed Core product features and fixed critical bugs across the automation platform
- Integrated Stripe billing (subscriptions, webhooks, account lifecycle management)
- Fixed subscription logic so expired accounts correctly lost access, preventing revenue leakage

JoVE: Mar 2022 – Sep 2025 – **Team Lead & Senior Full Stack Engineer**

Project: Scientific publishing platform, engineering infrastructure.

- Implemented Mixpanel analytics tracking 1M+ daily events (actions, workflows, interactions)
- Built Azure-based AI translation pipeline processing 25,000+ scientific articles into 13 languages
- Led two platform redesigns involving 15 contributors (dashboards, planning tools, workflow systems)
- Created cross-squad daily visibility dashboard for engineering alignment and blocker detection
- Developed internal Highlight & Inspector extension (full-site data-testid coverage in 2 days)
- Improved SEO structure (canonical, JSON-LD, metadata) across thousands of pages
- Mentoring, architecture reviews, cross-team coordination (QA, Product, SEO, DevOps)

Chilean Army: Mar 2021 – Dec 2021 – **Software Engineer**

Project: Internal systems & automation.

- Backend services and APIs using Node.js + PostgreSQL
- Automated daily internet-to-intranet data synchronization replacing manual early-morning data transfers and reducing operational effort to zero
- Agile delivery in planning, implementation, testing, deployment

Freelance: Jan 2020 – Mar 2022 – **Team Lead, Full Stack Engineer**

Project: E-commerce, healthcare platforms, pet food stores.

- Full stack development with PHP, Symfony, React, MySQL
- Websites, landing pages & admin dashboards (responsive & SEO-optimized)
- Requirements, timelines, client delivery, supervision of junior collaborators

Accenture: Jul 2015 – Dec 2019 – **Software Engineer**

Project: Enterprise systems for large-scale clients.

- Led a 6-person innovation team (including associates and senior analysts), building an RPA solution using Automation Anywhere and Power BI to automate reporting from an internal ARS (Jira-like) system and provide real-time dashboards of task assignments and hours worked.
- Performed architectural analysis, development, and performance tuning.
- Led a team of 2 developers with direct client-facing responsibilities: gathered requirements, broke them down into tasks, distributed the work, contributed as a developer, and tracked team progress against the project timeline.

Skills: React, Next.js, TypeScript, PHP, Node.js, PostgreSQL, MySQL, GitLab, Symfony, Redis, Laravel, Docker, SEO, Mixpanel, E2E Testing, Unit Testing, WordPress, Azure AI Translation.
